

PROFESSIONAL WATERPROOFING

CHEAT SHEET

LEAKING GUTTERS

If the leak is small (a hole in the gutter less than 2mm in size), you can seal it with WP7-201 Spray and Seal.

If the gutter is cracked (larger than 5mm), tape it with WP7-202 Roof Tape for a permanently waterproof seal.

Both Spray & Seal and Roof Tape can be painted over if desired.

LEAK THROUGH CEILING

Use WP7-301 Roof Waterproof with all mineral felt/bitumen roofs. Locate the source of the leak, and apply WP7-301 with a spatula or brush.

For all other material roofs, use WP7-101 Liqueaseal. Use Fibre Tape as reinforcement. Liqueaseal can be painted over.

RISING DAMP

With Ireland's damp climate, Rising Damp issues are a common problem. WP7-402 Damp Stop is the ultimate solution against rising damp.

WP7-202 offers a lifelong water-repellent barrier, solving damp issues permanently.
